FURTHER INFORMATION RELATING TO RFQ 7243880

There is not a fire pump

The PIV valve is located in the front North corner of the building

The winning contractor must perform the testing for both the fire alarm and sprinkler systems and cannot use a sub contractor to perform the work. In the event that there is a problem with the Simplex panel and the manufacturer needs to be brought in, the Manufacturer of the panel is not considered a sub contractor. Upon receiving the award the contractor must supply the Agency with a complete list of employees that will be working at the facility. Contractor will ensure that the list is current and that the names of any new employees are provided to the agency 72 hours in advance of that employee working at the facility. Contractor must inform the agency of any employees that have been terminated immediately so they can be removed from the list.
